

Commercial recycling really pays off...

Grilling Up Savings

Before the first hotdog came off the grill at Angie's Famous Hotdogs, owner Angela Pauletich had her commercial recycling program in place. Angela and her general contractor husband, Dwayne, spent a few months completely refurbishing their restaurant on Georgia Street in Vallejo's historic downtown area. It was clear from the beginning that offering great food at reasonable prices was only part of their business goals.

"Our family recycles," explains Angela, "and we wanted to be one of the responsible businesses that are doing our part to save the Earth."

Angela contacted **Vallejo Garbage Service** and had a recycling program underway within a few weeks. It was only after starting her program that Angela realized how much recycling lowered her garbage bill.

"A great deal of our waste is just cardboard and paper. The recycling containers easily cut our trash volume in half. Every business needs to control their expenses and this was one of the easiest ways there is to save on expenses."

"A great deal of our waste is just cardboard and paper. The recycling containers easily cut our trash volume in half. Every business needs to control their expenses and this was one of the easiest ways there is to save on expenses."

Angela Pauletich, owner of Angie's Famous Hotdogs, knows first-hand how beneficial recycling is for her business. She estimates that her restaurant has cut their garbage volume in half through their commercial recycling program.

In Vallejo, commercial customers only pay for the amount of garbage they produce. Recyclable materials are collected at no extra charge. A commercial recycling program removes the recyclable materials from the trash can and keeps the garbage bill as low as possible.

"VGS provided all the bins and went over the rules of the program," said Angela. "There are times that we need to increase or decrease service. We just make a call and the service is adjusted. Recycling could not be any easier."

Experts from **Vallejo Garbage Service** will design a free commercial recycling program for any business or commercial rental complex in Vallejo. To start saving on your garbage bill call us today at 552-3110.

VGS WRAPs Up Another One

The California Integrated Waste Management Board has recognized **Vallejo Garbage Service**

with a W.R.A.P. award for 2007. The agency selected **VGS** because the company "is committed to protecting the environment through an application of stringent standards, innovatively recycling many different commodities, and reducing the amount of waste materials that go into landfills." In addition to helping the community recycle, **VGS** was recognized because their "employees are also dedicated to recycling within their facility. With the joint efforts of their employees in the last year for their facility alone, they have helped divert approximately 20 tons of materials from going into landfills."

The CIWMB is one of six boards and departments within the California Environmental Protection Agency. VALCORE Recycling and the Vallejo Chamber of Commerce also won WRAP awards for 2007.

Watch Out For Food and Garbage

Food waste, garbage or other non-recyclable materials will cause recycling containers to be tagged and either left unemptied or emptied and charged as garbage. Check your recycling containers to see if your employees are following the rules.

Great Disposal Tips

VGS offers a variety of solutions for unexpected volumes of trash and recyclables. Just call to have extra materials collected at your regular collection times. We also provide additional

collections during the week. **Vallejo Garbage Service** will deliver debris boxes of 20 yards or more for periodic garbage overloads. There are extra charges for these services. Call the office at 552-3110 for complete information and prices.

Most of the holiday extra trash contains large amounts of cardboard. **VGS** will empty cardboard bins as many times as needed during this heavy season. We will also deliver additional or larger recycling bins. There are no extra charges for these services.

Removing recyclable materials from the trash is an easy way for every commercial customer to save on their garbage bill. Commercial customers in Vallejo pay for services based on the volume of garbage they generate. The collection of recyclable materials is provided at no additional cost to the customer.

Every bit of recyclable material in your trash is money wasted. An effective recycling program helps you pay only for the amount of garbage you generate.

VGS Recycling Manager Lisa LeFebvre will provide a free recycling analysis to any business or commercial rental complex of 5 units or more. She will come to your location, analyze your trash flow, and then recommend a program that works best for you. Lisa can be reached at **Vallejo Garbage Service** at 552-3110. Her email is LLeFebvre@vallejogarbage.com.
